Summary

I'm a PHP developer with 3 years of hands-on experience building fast, reliable web applications. I've worked with frameworks like Laravel and CodeIgniter, and I'm comfortable handling both backend and frontend work using MySQL, JavaScript, Angular, and modern tools. Over the years, I've helped build everything from custom dashboards to APIs, always focusing on clean code and performance. I really enjoy solving problems and working with others to find the best solutions. Whether it's debugging something tricky or brainstorming features with a team, I like being involved in the full development process. I'm always learning and looking for ways to write better, more efficient code-and I take pride in building things that not only work well but are also easy to maintain and scale.

Experience

01/2023 – Current
Mumbai, Maharashtra

Senior Software Developer, Ebrandz LLP
Develop and maintain Laravel Admin Panel with dynamic reporting and RESTful APIs.
Integrated third-party APIs and services into software solutions, enhancing functionality and user experience.
Managed version control with Git, ensuring efficient collaboration and code management across the development team.
Developed and implemented software solutions to meet client requirements, enhancing system functionality and user satisfaction.

01/2022 – 01/2023
Remote

Junior Web Developer, Positive Quadrant LLP
Developed and maintained user-friendly website interfaces using HTML, CSS, and JavaScript to enhance user experience.
Implemented responsive design principles to ensure websites were accessible on various devices, improving accessibility for a broader audience.
Collaborated with senior developers to integrate back-end functionalities with front-end designs, streamlining website performance.

Education and Training

07/2025
Mumbai, Maharashtra

**Master of Science Computer Science,
Mumbai University Mumbai, Maharashtra**
MSc Computer Science graduate

01/2023
Mumbai, Maharashtra

**Bachelor of Science Information Technology,
Chetana College Mumbai, Maharashtra**

01/2020
Mumbai, Maharashtra

HSC Science, Patuck Junior College Mumbai, Maharashtra

01/2018
Mumbai, Maharashtra

SSC, Patuck Technical High school Mumbai, Maharashtra

Skills

- Angular
- Bootstrap
- PHP
- Laravel
- GitHub
- API integration
- Git
- Linux
- Javascript
- TypeScript
- CodeIgniter
- MySQL
- JQuery
- MongoDB
- Go High Level (CMS) integration

Languages

- **English** — Advanced
- **Hindi** — Native
- **Marathi** — Advanced
- **Bhojpuri** — Native

Certifications

JavaScript Certification, Chetna College, 03/23: Completed a hands-on certification program focused on core JavaScript concepts, including variables, functions, loops, DOM manipulation, and ES6+ features. Gained practical experience by building small projects and solving real-world coding challenges.

Hobbies and Interests

- Playing cricket
- Exploring new technologies and tools
- Listening to music
- Learning new programming languages
- Working on personal coding projects

Projects

iConnect SKN — Ferry Booking System
Designed and developed a robust web-based ferry booking system, iConnect SKN, using Laravel. The platform allows users to search ferry schedules, book tickets online, manage reservations, and receive booking confirmations. Implemented secure user authentication, role-based access for admins and users, and an intuitive dashboard for managing routes, schedules, and bookings.

LeadDetector — Real Estate Lead Generation Platform
Built a lead generation web application for the real estate industry using Angular and CodeIgniter 3. Designed the system to collect and manage leads from various data sources and a custom CMS, enabling real estate professionals to easily track, qualify, and follow up with prospects. Integrated third-party APIs, implemented secure role-based user access, and developed a clean, responsive user interface to deliver a smooth experience across devices.

MinutePages - Quick Website Builder for Real Estate
Created MinutePages using Angular and CodeIgniter 3. This tool lets users build a WordPress website in just five minutes. Added a customer dashboard so real estate agents can easily manage their site and keep track of their leads in one place.
